High Static Pressure

The mixed-flow impeller design enables the fan to overcome high static pressures, making it suitable for applications where airflow resistance is a concern.

Applications

Offices, hospitals, beauty salons, veterinary clinics, commercial bathrooms, and residential applications such as kitchen range hood exhausts.

Easy Installation and Reliability

The fan comes with fan brackets for quick and easy installation, streamlining the setup process for users.

Built-in Thermal Protection

Built-in thermal overload protection with automatic reset functionality prevents motor overheating and damage.
