### Applications

This exterior exhaust fan extracts stale, humid, and polluted air from indoor areas. Application examples include bathrooms, utility rooms, residential garages, etc.

### Durable Construction

Features a galvanized RAL9016 painted housing, minimizing the potential for corrosion, and ensuring long-lasting performance and durability.

### Controllability

Lightweight, compact, and simple to install. Controllable with an external speed control between 20 and 100%.

### Compatible with BMS

Product performance can be monitored and analyzed by a building management system via 0-10V DC signal.
