# **SHR 3005R**

### Heat Recovery Ventilator

Product #: 40214

The SHR 3005R's double core configuration provides the greater thermal efficiency needed for homes being built to a higher energy standard. The incoming air passes through a first, then a second heat exchanger to provide maximum heat recovery. During winter, fresh incoming air is tempered by the heat that is transferred from the outgoing air so you save on energy costs, while during summer, the incoming air is precooled if the house is equipped with an air cooling system.

#### **Features**

- Compact design
- Fans with backward curved RadiCAL blade
- Electrostatic filters (washable)
- Two (2) aluminum heat recovery core
- External screw type dry contacts
- Improved core guide channels for easy removal of core
- Weighs 90 lbs (41 Kg)

#### **Optional Controls**

• ECO-Touch™ (#44929) — Programmable Touch Screen Wall Control

• EDF7 (#44883) — Electronic multi-function dehumidistat

• RTS3 (#40376) - 20/40/60 minute over-ride

• MDEH1 (#40172) — Dehumidistat

#### **Specifications**

Duct size
Voltage/Phase
Power rated
Amp
6" (152 mm)
120/1
336 W
Amp
2.8 A

• Average airflow – 253 cfm (119 L/s)

@ 0.4" P<sub>s</sub> (100Pa)

## C US

#### Fans

Two (2) factory-balanced fans with backward curved blades. Motors come with permanently lubricated, sealed ball-bearings to guarantee long life and maintenance-free operation.

#### **Heat Recovery Core**

Aluminum heat recovery core configured for efficient cross-flow ventilation. Core is  $12^{\circ}$  x  $12^{\circ}$  (305 x 305 mm) with a 15° (380 mm) depth. Cores are manufactured by Fantech to withstand extreme temperature variations.

#### Defrost

During the defrost sequence, a motorized damper temporarily blocks the incoming fresh air stream so that the warm air from the house can circulate through the HRV. The exhaust blower shuts down and the supply blower switches into high speed to maximize the effectiveness of the defrost strategy. During this cycle, household odors from the kitchen or bathroom are prevented from entering the home and the unit will not create negative pressure.

#### Serviceability

Core, filters, fans and drain pan can be easily serviced through latched access door located on front of the cabinet. Core conveniently slides out with ease on an improved railing system. 17" (432 mm) of clearance is recommended for removal of core.

#### Case

24 gauge galvanized steel. Baked powder coated paint.

#### Insulation

Cabinet is fully insulated with 1" (25 mm) high density expanded polystyrene.

#### **Filters**

Two (2) washable electrostatic panel type air filters 11.75" (298 mm) x 15" (380 mm) x 0.125" (3mm).

#### **Controls**

External three (3) position (Low/Stand By/Medium) rocker switch that will offer continuous ventilation. Fantech offers a variety of external controls. (see controls)

#### Installation

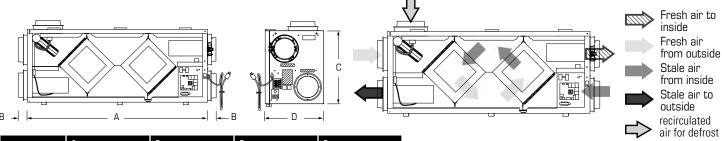

Unit is typically hung by using installation kit supplied with unit. Mounting bolts provided on top four (4) corners of unit.

#### Warranty

Limited lifetime on aluminum core, 7 year on motors, and 5 year on parts.

#### **Dimensions & Airflow**

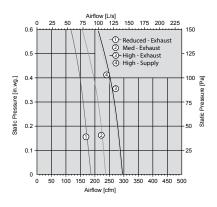

| Model    | A                  |      | В                 |    | C                              |     | D                  |     |
|----------|--------------------|------|-------------------|----|--------------------------------|-----|--------------------|-----|
|          | in                 | mm   | in                | mm | in                             | mm  | in                 | mm  |
| SHR3005R | 50 <sup>7</sup> /8 | 1292 | 2 1/ <sub>5</sub> | 6  | 22 <sup>1</sup> / <sub>5</sub> | 564 | 17 <sup>3</sup> /8 | 441 |

Clearance of 17" (432mm) in front of the unit is recommended for removal of core. All units feature three foot plug-in power cord with 3-prong plug.

#### **Ventilation Performance**

| in. wg. (Pa)          | 0.2 (50)  | 0.4 (100) | 0.6 (150) |  |
|-----------------------|-----------|-----------|-----------|--|
|                       | cfm (L/s) | cfm (L/s) | cfm (L/s) |  |
| Net supply airflow    | 262 (124) | 231 (109) | 204 (96)  |  |
| Gross supply airflow  | 270 (127) | 238 (112) | 211 (100) |  |
| Gross exhaust airflow | 279 (132) | 247 (117) | 215 (101) |  |

These measurements are for HIGH speed only

#### **Energy performance**

|         | Supply to | Supply temperature |     |     | Consumed power | Sensible recovery efficiency | Apparent sensible effectiveness | Latent recovery/moisture transfer |

#### **Requirements and standards**

- · Complies with the UL 1812 requirements regulating the construction and installation of Heat Recovery Ventilators
- Complies with the CSA C22.2 no. 113 Standard applicable to ventilators
- Complies with the CSA F326 requirements regulating the installation of Heat Recovery Ventilators
- Technical data was obtained from published results of test relating to CSA C439 Standards
- HVI certified
