One of Fantech's most popular HRV for home projects, the VHR 150 is designed for higher static pressure applications. The unit brings a continuous supply of fresh air into a home while exhausting an equal amount of contaminated air. During winter, fresh incoming air is tempered by the heat that is transferred from the outgoing air so you save on energy costs, while during summer, the incoming air is pre-cooled if the house is equipped with an air cooling system. The VHR 150 is equipped with automatic defrost mechanisms so you can use your HRV all year long.

**Features**
- Airflow up to 159 CFM (75 L/s) @ 0.4” Ps (100 Pa)
- 6” (152mm) oval duct connections with integrated airflow measurement
- Compact design, only 23.75” (603 mm) wide
- Fans with backward curved RadICAL blade
- Electrostatic filters (washable)
- Aluminum heat recovery core
- Removable screw terminal for easy connection
- Easy Core Guide Channels For Removing Core
- Only weighs 45 lbs (20Kg)

**Optional Controls**
- ECO-Touch™ (#44929) – Programmable Touch Screen Wall Control
- EDF7 (#44983) – Electronic multi-function dehumidistat
- EDF1 (#42075) – Multi-function control
- RTS5 (#44794) – 20/40/60 minute over-ride
- RTS2 (#40164) – 20 minute over-ride
- MDEH1 (#40172) – Dehumidistat

**Specifications**
- Duct size – 6” (152 mm) oval
- Voltage/Phase – 120/1
- Power rated – 156 W
- Amp – 1.2 A
- Average airflow – 159 cfm (75 L/s) @ 0.4” Ps (100 Pa)

**Fans**
Two (2) factory-balanced fans with backward curved blades. Motors come with permanently lubricated, sealed ball-bearings to guarantee long life and maintenance-free operation.

**Heat Recovery Core**
Aluminum heat recovery core covered by a limited lifetime warranty. Core dimensions are 9” x 9” (229 x 229 mm) with a 15” (381 mm) depth. Our heat exchangers are designed and manufactured to withstand extreme temperature variations.

**Defrost**
A preset defrost sequence is activated at an outdoor air temperature of 23°F (-5°C) and lower. During the defrost sequence, the supply blower shuts down & the exhaust blower switches into high speed to maximize the effectiveness of the defrost strategy. The unit then returns to normal operation, and continues cycle.

**Serviceability**
Core, filters, fans, drain pan and electrical panel can be accessed easily from the access panel. Core conveniently slides out with only 17” (432 mm) clearance.

**Case**
24 gauge galvanized pre-painted steel corrosion resistant

**Insulation**
Cabinet is fully insulated with 1” (25 mm) foil-face high density expanded polystyrene.

**Filters**
Two (2) washable electrostatic panel type air filters 8.5” (216mm) x 15” (380 mm) x 0.125” (3mm).

**Controls**
External three (3) position (Low/Stand By/Medium) rocker switch that will offer continuous ventilation. Fantech offers a variety of external controls. (see controls)

**Installation**
Unit is typically hung by using installation kit supplied with unit. Mounting bolts provided on top four (4) corners of unit.

**Warranty**
Limited lifetime on aluminum core, 7 year on motors, and 5 year on parts.
Dimensions & Airflow

Clearance of 17” (432 mm) in front of the unit is recommended for removal of core. All units feature three foot plug-in power cord with 3-prong plug.

Requirements and standards

- Complies with the UL 1812 requirements regulating the construction and installation of Heat Recovery Ventilators
- Complies with the CSA C22.2 no. 113 Standard applicable to ventilators
- Complies with the CSA F326 requirements regulating the installation of Heat Recovery Ventilators
- Technical data was obtained from published results of test relating to CSA C439 Standards
- HVI certified
