Fantech’s most efficient series yet! The HERO 150H-EC is ideal for high-rise apartment applications, condominiums, single and multi family homes. With a completely new design the HERO 150H-EC features a Counterflow core, round metal collars and a high efficiency rating! EC motors use intelligent technology with integral electronic controls to ensure energy savings no matter what the airflow demands. Reduced energy usage results in lower operating costs. The motors develop less heat so significantly less maintenance is needed and the lifetime of the motor is increased.

**Features**
- Electronically commutated motors (ECM)
- TurboTouch function boosts exhaust capacity
- 6” (152mm) round metal duct connections with rubberized duct seals
- Removable screw terminal for easy connection with external access
- Top port design fits in tight spaces
- Includes wall mounting speed bracket
- Counterflow heat recovery core
- Multiple speed operation
- Internal recirculation defrost
- Integrated MERV-8 Filter
- 50.9 lbs (23.1kg) including core

**Optional Controls:**
- ECO-TOUCH® (#44929) – Programmable Touch Screen Wall Control
- EDF7 (#44983) – Electronic multi-function dehumidistat
- EDF1R (#40933) – Multi-function dehumidistat
- RTS2 (#40164) – 20 minute timer over-ride
- RTS5 (#44794) – 20/40/60 minute timer
- MDEH1 (#40172) – Dehumidistat

**Specifications**
- Duct size – 6” (152mm) round
- Voltage/Phase – 120/1
- Power rated – 110 W
- Amp – 3.0 A
- Average airflow – 176 cfm (83 L/s) @ 0.4” P, (100 Pa)

**Fans**
Two (2) electronically commutated motors. The EC fans operate at high efficiency levels and offer a great energy-saving potential not only at full load, but especially at part-load. When operating at part-load, the energy used is much lower than with an AC motor of equivalent output. Reduced energy usage guarantees a drop in operating costs.

**Heat Recovery Core**
Counterflow heat recovery exchanger built from thermoformed polymer plates covered by a limited lifetime warranty. Core dimensions are 14.4” x 14.4” (366 x 366 mm) with a 12” (305 mm) depth. Our heat exchangers are designed and manufactured to withstand extreme temperature variations.

**Winterguard™ Defrost**
The unit incorporates a unique and quiet internal recirculation defrost that does not depressurize the home during the defrost cycle. A preset defrost sequence is activated when the outdoor temperature falls below 23° F (-5° C) and automatically adjusts itself based on operating conditions. The fan speed is also adjusted automatically to provide a smooth and quiet transition between Ventilation & Defrost mode.

**Serviceability**
Core, filters, fans and electronic panel can be accesses easily from the access panel. Core conveniently slides out with only 14” (355 mm) clearance.

**Duct Connections**
6” (152mm) round metal duct connections with rubberized seal.

**Case**
24 gauge galvanized pre-painted steel corrosion resistant

**Insulation**
Cabinet is fully insulated with 3/4” (20 mm) high density expanded polystyrene.

**Filters**
Two (2) washable electrostatic panel type air filters 7.87” (200mm) x 11.81” (300mm) x 0.125” (3mm). A MERV-8 supply filter is provided with the unit. The MERV8 supply filter is intended for areas that it is required. In most cases the MERV8 supply filter is not required and it becomes optional at the home owner’s discretion. MERV-8 dimensions 5.77” x 12.09” x 1.75” (146.5mm x 307mm x 44.5mm).

**Balancing and commissioning**
Balancing must be completed using the Fantech ECO-Touch® Programmable Touch Screen Wall Control

**Warranty**
Limited lifetime on counterflow exchanger, 7 year on motors, and 5 year on parts.
Dimensions & Airflow

- Clearance of 14" (355mm) in front of the unit is recommended for removal of core. All units feature three foot plug-in power cord with 3-prong plug.

Ventilation Performance

- Energy performance results were obtained without the MERV-8 filter installed.

Requirements and standards

- Complies with the UL 1812 requirements regulating the construction and installation of Heat Recovery Ventilators
- Complies with the CSA C22.2 no. 113 Standard applicable to ventilators
- Complies with the CSA F326 requirements regulating the installation of Heat Recovery Ventilators
- Technical data was obtained from published results of test relating to CSA C439 Standards. This data was obtained without the use of the MERV-8 supply filter.
- HVI certified and ENERGY STAR® qualified*

* This product earned the ENERGY STAR® by meeting strict efficiency guidelines set by Natural Resources Canada and the US EPA. It meets ENERGY STAR® requirements only when used in Canada.

Energy performance results were obtained without the MERV-8 filter installed.
