House Party

ECO-Feel®

The ECO-Feel™ optimizes your Fresh Air Appliance performance based on the indoor air quality, indoor relative humidity (RH) and outdoor temperature. Factory preset at RH 45% to run the appliance at low speed continuously.

Set it and forget it...

The unique, screenless design makes this controller ideal for multi-family and rental properties. The features under the hood maintain a high Indoor Air Quality while having the benefit of being tamper-proof.
